KEY FOR INTERPRETATION OF AGRICULTURE CAPABILITY MANUSCRIPT MAPS (B.C.)

There are 7 capability classes for agriculture with 1 representing the highest class and 7 representing the lowest. In some areas of the province, two ratings are shown: one for dry farming and a second for irrigated or drained (improved) conditions. The irrigated ratings are shown enclosed in round brackets while the drained ratings appear in square brackets. In all cases improved ratings have precedence over dry farm ratings.

Example Classifications

The agriculture capability classes are determined on the relative range of crops the land can produce.

a) Capability Classes

- Class 1 - widest range of crops
- Class 2
- Class 3 } reduced range of crops caused by a number of limiting
- Class 4 } factors (subclasses)
- Class 5 - only permanent pasture or forage
- Class 6 - natural grazing
- Class 7 - no productivity

b) Limiting Subclasses

- C - adverse climate
- D - undesirable soil structure
- E - erosion
- F - low fertility
- I - inundation (flooding)
- M - moisture deficiency (droughtiness)
- N - salts
- P - stoniness
- R - bedrock near the surface
- T - topography (slope)
- W - excess water
- X } combination of soil factors
- S } cumulative and minor adverse characteristics

Tree fruit and grape growing areas: these crops are tolerant of soil conditions that limit field crops. Steep and stonier soils in suited climates have been upgraded to accommodate the expanded range of crops. e.g. A class 5T soil dry farmed becomes a 3T irrigated in an area climatically suited to tree fruits.

Note: A more detailed 16 page manual entitled Soil Capability Classification for Agriculture is available from the Lands Directorate, Lands Forests and Wildlife Service, Department of the Environment, Ottawa, Ontario, K1A 0H3.

Drop off to crown
land on the west side

Immediate steep drop off on the north side of the property down to a coulee. Aside from the existing home and garage, the remaining land is paved road/gravel access and trees/shrubs landscaping.

An aerial photograph of a residential area, likely a lakefront property. The image shows several houses with various roof colors (blue, red, white), driveways, and landscaping. A large body of water is visible in the bottom left corner, with a small dock extending into it. The surrounding area is heavily forested with tall evergreen trees. Green arrows and text boxes are overlaid on the image to indicate specific areas of interest.

Usable land is occupied by home, garage
and paved/gravel access driveway and landscaping
