

My name is Peter Dusome and I operate 1st Street appliance in Cranbrook. I have two employees and a shop located at 813 1st Street Cranbrook. In 2005 I was given permission from the rdek to remove appliances I found at the transfer station that were repairable and to recycle these appliances. I have done this for the last 20 years without incident. On January 16th a letter was issued by the environmental services forman resending this authorization.

I would like to make a presentation to the board in hopes of having my permission to remove appliances that are repairable and reusable reinstated. These appliances for the most part are constructed of glass and plastic which ends up in the landfill.

I would like to attend the meeting in person.

My business is dependent on access to these appliances and otherwise I doubt I will be able to continue with First Street Appliance.
